WIRELESS CONNECTIONS

Due to external factors, including the nature of public wireless internet and each computer's operating system/configuration, InBusiness only recommends wireless connections for casual Internet browsing and checking e-mails. If the reason for connecting to the Internet is for business related purposes, or event critical activities, for example - processing orders, processing credit card payments, web-based presentations, etc., InBusiness strongly recommends a hardwire connection. A wireless connection may not provide the consistency necessary for conducting online business.
InBusiness Connections does not accept responsibility for wireless performance.
