RefriAméricas 2025 Forms Strategic Alliance with the Chilean Chamber of Refrigeration and Air Conditioning A.G.

The HVAC/R trade show strengthens its regional presence and commitment through collaboration with the Chilean industry association.

Santo Domingo, Dominican Republic (May 2025) – *RefriAméricas 2025*, the leading event for the refrigeration and air conditioning industry in Latin America and the Caribbean, announces a new strategic alliance with the *Chilean Chamber of Refrigeration and Air Conditioning A.G.*, a professional association with over three decades of experience in training, representation, and technical certification in Chile's HVAC/R sector.

This partnership reinforces RefriAméricas' regional focus and will facilitate the exchange of experiences, the promotion of best practices, the encouragement of continuous training, and the strengthening of cooperation among companies, technicians, and professionals in both countries. As part of the agreement, the Chamber will participate in future editions of RefriAméricas and collaborate on academic programs, workshops, and industry-related activities.

Founded in 1989, the Chilean Chamber is widely recognized for its active role in establishing *CECCL FrioCalor*, the only center accredited by *ChileValora* to assess and certify labor competencies in air conditioning and refrigeration in the country.

"This alliance allows us to further our mission of building bridges with organizations committed to the professional development of the HVAC/R industry across the region. The Chilean Chamber of Refrigeration and Air Conditioning A.G. is a benchmark in technical excellence, professional ethics, and lifelong learning, making its addition as a strategic partner of RefriAméricas 2025 a source of great excitement and expectations," said Fabio Giraldo, Project Manager of RefriAméricas.

About RefriAméricas 2025

RefriAméricas is the leading trade show for the air conditioning and refrigeration sector in Latin America, organized by *ACR Latin America* and *Latin Press, Inc.* Its 2025 edition will be held at Sans Soucí Ports in Santo Domingo, Dominican Republic, on July 23–24, featuring an international trade exhibition, academic conferences, workshops, technical tours, and professional networking opportunities.
